Summary

Cybersecurity Engineering student with hands-on experience in web application development, security monitoring systems, SIEM implementation, and network security. Experienced in developing dashboards and backend services using Golang, Python, PHP, and MySQL while applying cybersecurity principles in academic and project environments.

Experience

IT Support Intern , <i>PT. Varta Microbattery Indonesia Batamindo Industrial Park</i>	01/2022 – 04/2022 Batam, Indonesia
• Performed network configuration and troubleshooting • Assisted in fiber optic installation and maintenance • Conducted routine server maintenance and monitoring	

Education

Cybersecurity Engineering , <i>Politeknik Negeri Batam</i> GPA: 3.79 / 4.00	02/2024 – Present
Computer and Network Engineering , <i>SMK Negeri 3 Batam</i> Score: 86.17	07/2020 – 05/2023

Technical Skills

Cybersecurity & Networking SIEM, SOC Monitoring, Network Security, pfSense, VLAN, Cisco, Wireshark	Tools & Platforms Wazuh, Grafana, Graylog, Kali Linux, Ubuntu, Firebase, GNS3
Security Testing Vulnerability Assessment, Penetration Testing	IoT Development Arduino IDE, ESP32, Arduino Nano, GPS Module
Programming & Development Python, Golang, PHP, JavaScript, CSS, HTML	Database MySQL, NoSQL

Projects

Vulnerability Assessment and Penetration Testing (Mobile Applications) • Conducted mobile application security testing based on OWASP Mobile Application Security Testing Guide (MASTG) • Identified and documented security vulnerabilities in client mobile applications • Provided remediation recommendations to address identified issues	02/2026 – Present
Real-Time Location System (RTLS) Based on Wireless Communication • Developed smart tag hardware using microcontroller, buzzer, battery, and GPS module • Built cloud platform using Firebase for real-time data transmission • Developed web dashboard for real-time smart tag location monitoring	08/2025 – 01/2026

SIEM Development & SOC Simulation - Configured network segmentation and firewall rules using pfSense - Integrated SIEM and SOC monitoring into a unified web platform - Simulated SOC environment for incident detection, monitoring, and response	02/2025 – 07/2025
Well-Architected SIEM Implementation - Developed a web-based SIEM platform and integrated security monitoring features - Contributed as a full-stack web developer for dashboard and backend integration	08/2024 – 01/2025
Heart Rate Monitoring System for Athletes (IoT-Based) - Designed UI/UX for mobile monitoring application - Developed frontend mobile interface using Android Studio	05/2024 – 07/2024
DDoSDefend Matrix: Security Script with Data Structure Algorithms for DDoS Attack Simulation - Configured attack simulation environment using GNS3 - Designed network topology and mitigation logic scripts	02/2024 – 07/2024
Web-Based Caesar Cipher Application - Developed full-stack web application to demonstrate basic cryptography concepts - Implemented Caesar Cipher algorithm for encryption and decryption	08/2023 – 12/2023

Achievements

Finalist, Pekan Ilmiah Mahasiswa Nasional (PIMNAS) 2024  , Puspernas	18/10/2024
3rd Place Winner, PBL Expo 2024 – Cybersecurity & Networking Category  , Politeknik Negeri Batam	17/08/2024
Awardee, Program Kreativitas Mahasiswa (PKM KC) 2024  , Kemendikbutristek	15/11/2024

Certificates

Cyber Threat Management  Cisco Networking Academy	Cybersecurity Essentials  Cisco Networking Academy	RedHat OpenShift Developer  Red Hat
